ALL ALUMINIUM PASSENGER VESSEL

MS PASSENGER VESSEL

OFF-SHORE UTILITY VESSEL

Over the years, Mandovi Drydocks has diversified its profile by venturing into ship designing and building, as well as conversions, upgradations and modifications of existing boats and ships to enhance their performance capabilities. It has developed a wide range of maritime products for the commercial sector, including fishing trawlers, pontoons, inland cargo barges, passenger vessels, tugs, ferry boats, dredgers, off-shore utility vessels and coasters.

Mandovi Drydocks with its facilities at Bicholim, North Goa on the banks of river Mandovi and at Rassaim, South Goa on the banks of river Zuari is a multi-purpose yard, providing integrated ship building, repairs, and other allied services. Its core strength lies in competent manpower and state-of-the-art machinery and infrastructure.

With 100 acres newly added to house its new cutting-edge dry docks & ship-building facility at Dabol in Maharashtra, Mandovi Drydocks is poised for a great leap ahead with clients across India and Middle East.

One of the biggest drydocks in Goa's private sector at 84 metres long, 16 metres wide and a draft of 2.5 metres, it has all the necessary infrastructure and facilities to accommodate and repair vessels up to 4000 DWT.

Energy efficient instruments such as inverter-based welding machines, plasma-cutting CNC machine, CO2 welding machines, and submerged arc welding machines are used in construction and repair activities.

The shipyard has a full-fledged machine shop equipped with lathes, shaping machines, hacksaw machines, drill machines and other specialised equipment to cater to different types of fabrication jobs.
